2017 FR 200

## Volatile business sentiment in the Digital Signage market in France

Fig. 1: DBCI France 2nd Quarter 2017, n=20

- The Digital Signage Business Climate Index has slightly decreased, but still remains on a positive level in the second quarter of 2017. The index fell by 7,60 base points from 47,60 points to 40,00 base points.
- With good answers increasing by 3% the assessment of the current business situation has become more positive than in the previous survey.
- In contrast the outlook towards the near future is on a decline. Now only 50% of the surveyed companies are expecting an *more favourable* business situation for their products and services in the next six months.

### Further Research

- Microsoft Windows is still the major player in the OS market for Digital Signage installations. However, Linux is gaining traction and was implemented in 28% of all projects in 2016.

Participants: n=20; Region: FR; Survey Period: 2017 calendar weeks 14-15

# Good current business situation and much more conservative outlook

Current business Situation | France | 2nd Quarter 2017

Expectations | France | 2nd Quarter 2017

# OS 2016 | Windows in first and Linux challenges

**Question:** How high was the percentage of operating systems used in Digital Signage Projects in 2016?

Windows is implemented most frequently with Digital Signage projects. However other operating systems have significantly gained ground in the last two years.

Particularly Linux based installations are becoming consistently more popular. Here cost and security issues are dictating the decisions. With Digital Signage installations becoming more varied in size and required performance, the appliances running on a non-PC architecture like Raspberry Pi, Cisco, BrightSign, Spinetix etc. are more widely integrated.

Also cost effective systems operating on Android basis currently have the highest dynamic in the market. Still many security and performance issues remain.

Apple operating systems could establish a robust nice segment. However, many managers with IT responsibility dismiss it as an operating system for Digital Signage installations.

Market share of IT operating systems in Digital Signage installations 2016
